2. gather your tools: bowls, knives (smaller ones work best for details), scooping spoons, tape, thumbtacks (yes, these are important), drill and various sized bits, cleaning supplies.
3. cut a hole in the top of the pumpkin. make sure it's big enough to fit the candle you plan to use.
4. scoop out insides of pumpkin. save seeds for toasting. (mmm... pumpkin seeds.) discard the rest of the innards in your compost.
5. when pumpkin is scooped, place the printout of your design on the pumpkin. move it around until you like the way it looks. tape design to pumpkin.
6. this is the cool part: push a thumbtack through the paper and into pumpkin, creating an outline of your design.
